SKIN CENTER EARNS RECOGNITION

The Dermatology & Skin Cancer Center's Lee's Summit facility has been recognized by HealthCare Design Magazine, in conjunction with The Center of Health Design, for exemplifying excellence in the field of health care design. The center will be featured in the publication's 2007 Architectural Showcase. The Dermatology & Skin Cancer Center, designed by ACI/ Boland, Inc. of Leawood, was recognized for its concept of a "building used as a billboard" on the outside of the building while providing a less clinical feeling on the inside. Healthcare Design noted the building's front entrance canopy, curving walls, interiors featuring natural materials and other warm accents for its selection.
